Shivam Hospital

A PROJECT REPORT
Submitted to

Noble University, Junagadh

for the Partial requirement fulfillment in

Bachelor of Computer Applications

Sem - 2

Prepared by

Ms. Hetvi Vala [Enr.No.- 230431272]
Ms. Vishva Mathukiya [Enr.No.-230431164]
Ms. Solanki Avantika [Enr. No.-230431238]

Guided by

Mr. Anant Joshi, Professor,
Faculty of Computer Application, Noble University - Junagadh

Noble BCA College, Noble University - Junagadh

Certificate

This is to certify that the project report entitled Shivam Hospita is a bonafide record of research work done by Hetvi Vala , Vishva Mathukiya , Avantika Solanki Enrollment No.: 230431272 , 230431164 , 230431238 under my supervision and submitted to **Noble university** in partial fulfillment for BACHELOR OF COMPUTER APPLICATIONS(BCA) SEMESTER 2.

Signature of the Guide
Designation:

Acknowledgment

Being a student this was really a big task for us to make a project. We are very thankful to all those who helped us in preparing this project. We have been fortune for getting the guidance and kind help from our professor Anant Joshi.

We are especially thanks to our **Dean and project guide** for providing us such a nice platform for the project it is our great pleasure that for providing the chance for the project in HTML, CSS, Bootstrap and Java Script. We are thankful for these suggestions. We are heartily thankful to them.

Student Name: Hetvi Vala , Vishva Mathukiya , Avantika solanki

Enrollment No: 230431272, 230431164 , 230431238

Program: BCA

INTRODUCTION

1. Introduction:

Welcome to Shivam Hospital, where compassionate care meets cutting-edge medical expertise. At our Hospital, we are dedicated to providing unparalleled healthcare services to our patients, ensuring their well-beingand comfort every step of the way. With a team of highly skilled medical professionals and state-of-the-art facilities, we strive to deliver personalized treatment tailored to each individual's needs. Whether you're seeking routine medical care, specialized treatment, or emergency services, you can trust us to provide the highest standard of care with integrity, empathy, and innovation.Welcome to a place where your health and wellness are our top priorities. Hospital administrators are often inundated with information about a large number of patients and their visits to the hospital that need to be organized and kept up-to-date. The Shivam Hospital is a web based application that is designed and developed for hospital administrators and doctors to organizeinformation on patient visits. During this process, there will be many tasks that have to be handled by this hospital including maintaining complete information. The main objective of the hospital is to provide the administration staff and doctors with an easily maintainable information system for patient registration, visit scheduling and patient tracking with latest information.

2. Student Profile :

Team Size : 3

Member 1 details :

Student Name : Hetvi Vala
Enrolment No : 230431272

Member 2 details :

Student Name : Vishva Mathukiya
Enrolment No : 230431164

Member 2 details :

Student Name : Avantika Solanki
Enrolment No : 230431238

3. Project Profile :

Project on :- Shivam Hospital

Developed By:- Hetvi Vala [230431272],

Vishva Mathukiya [230431164],

Avantika Solanki [230431238]

Sem –Year:- B.C.A Sem 2nd 2023-2024.

Guidence By:- Mr. Anant Joshi.

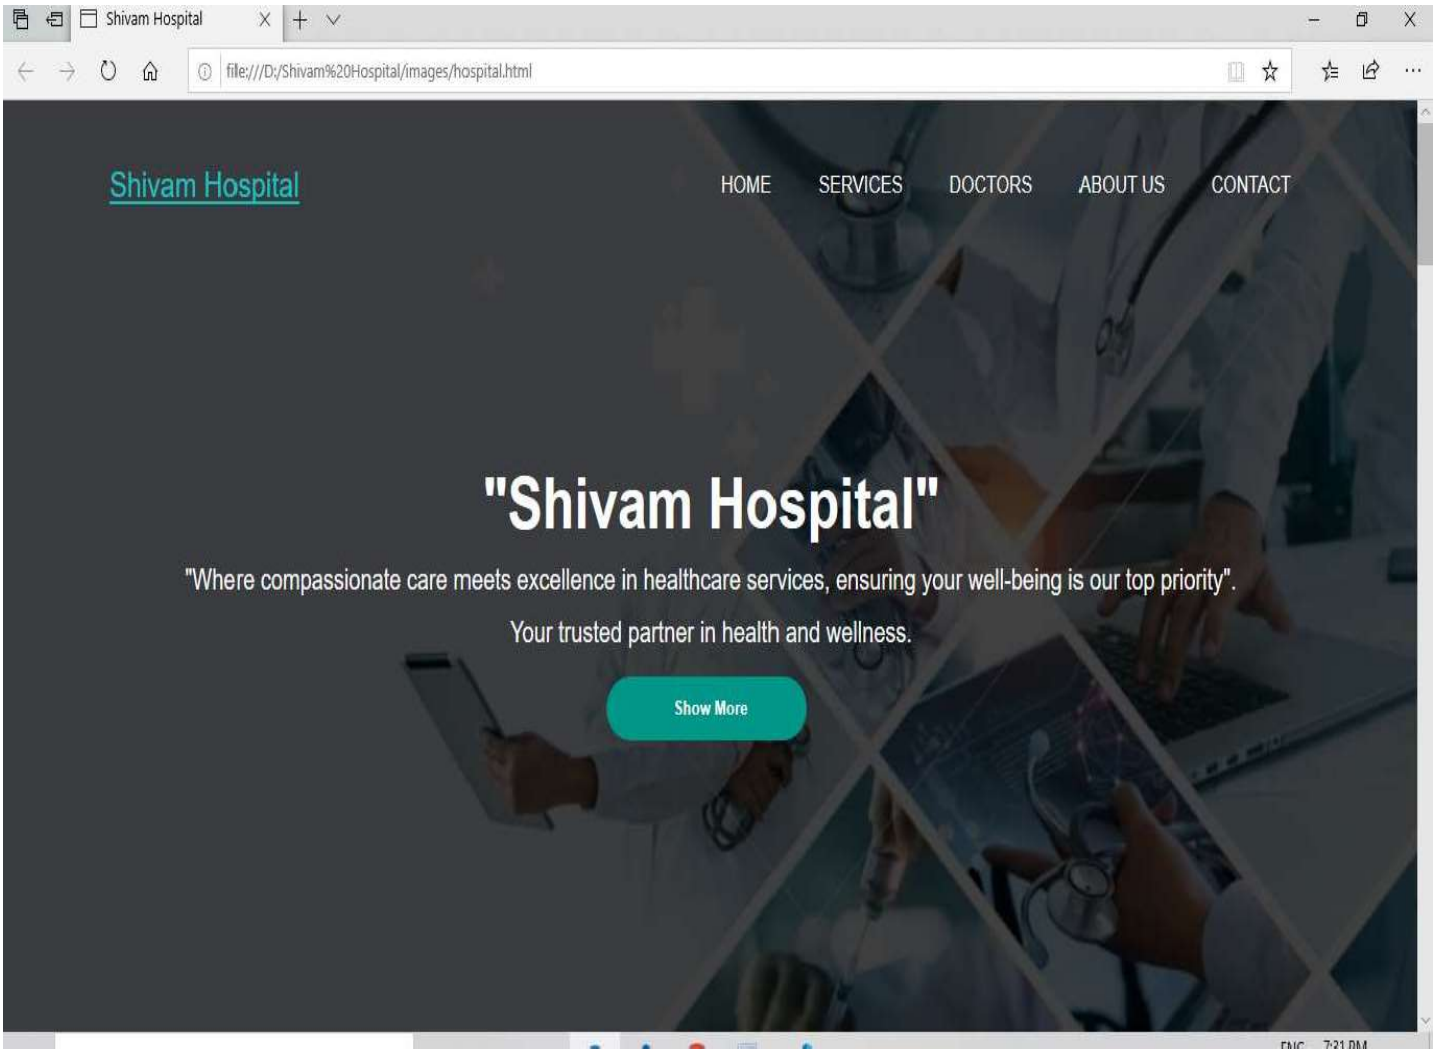
Technology:- HTML, CSS

Platform:- Windows

Submited To:- Noble Univesity.

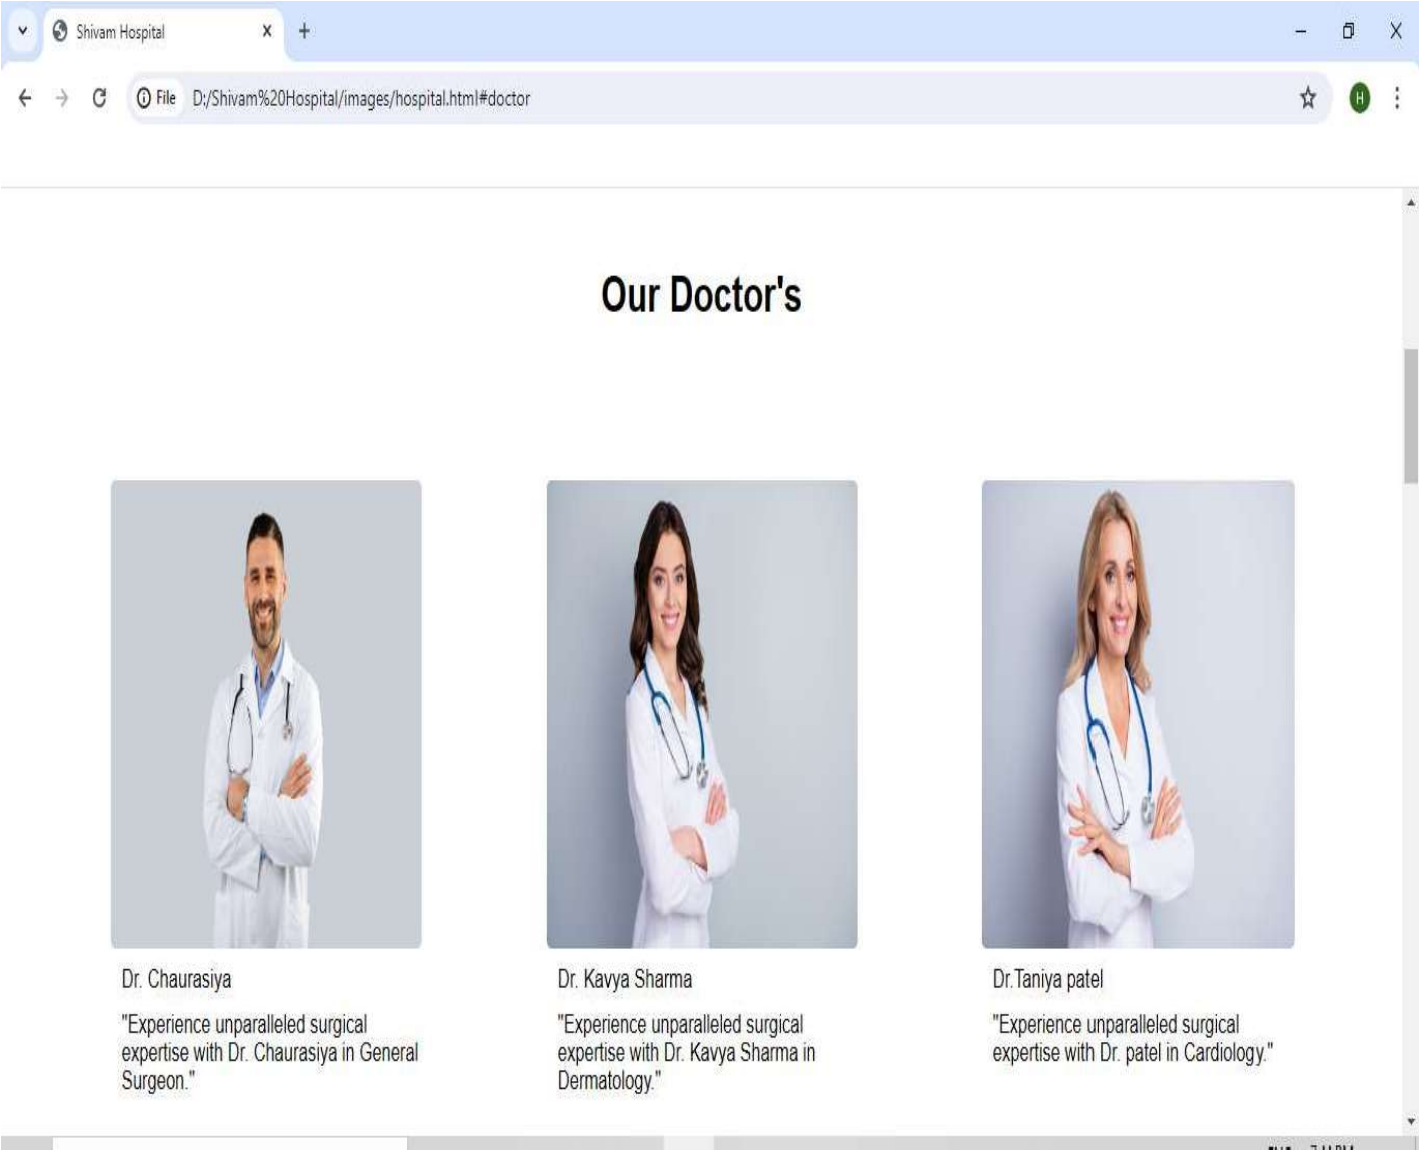
SYSTEM SNAPSHOTS

4. System Snapshot :



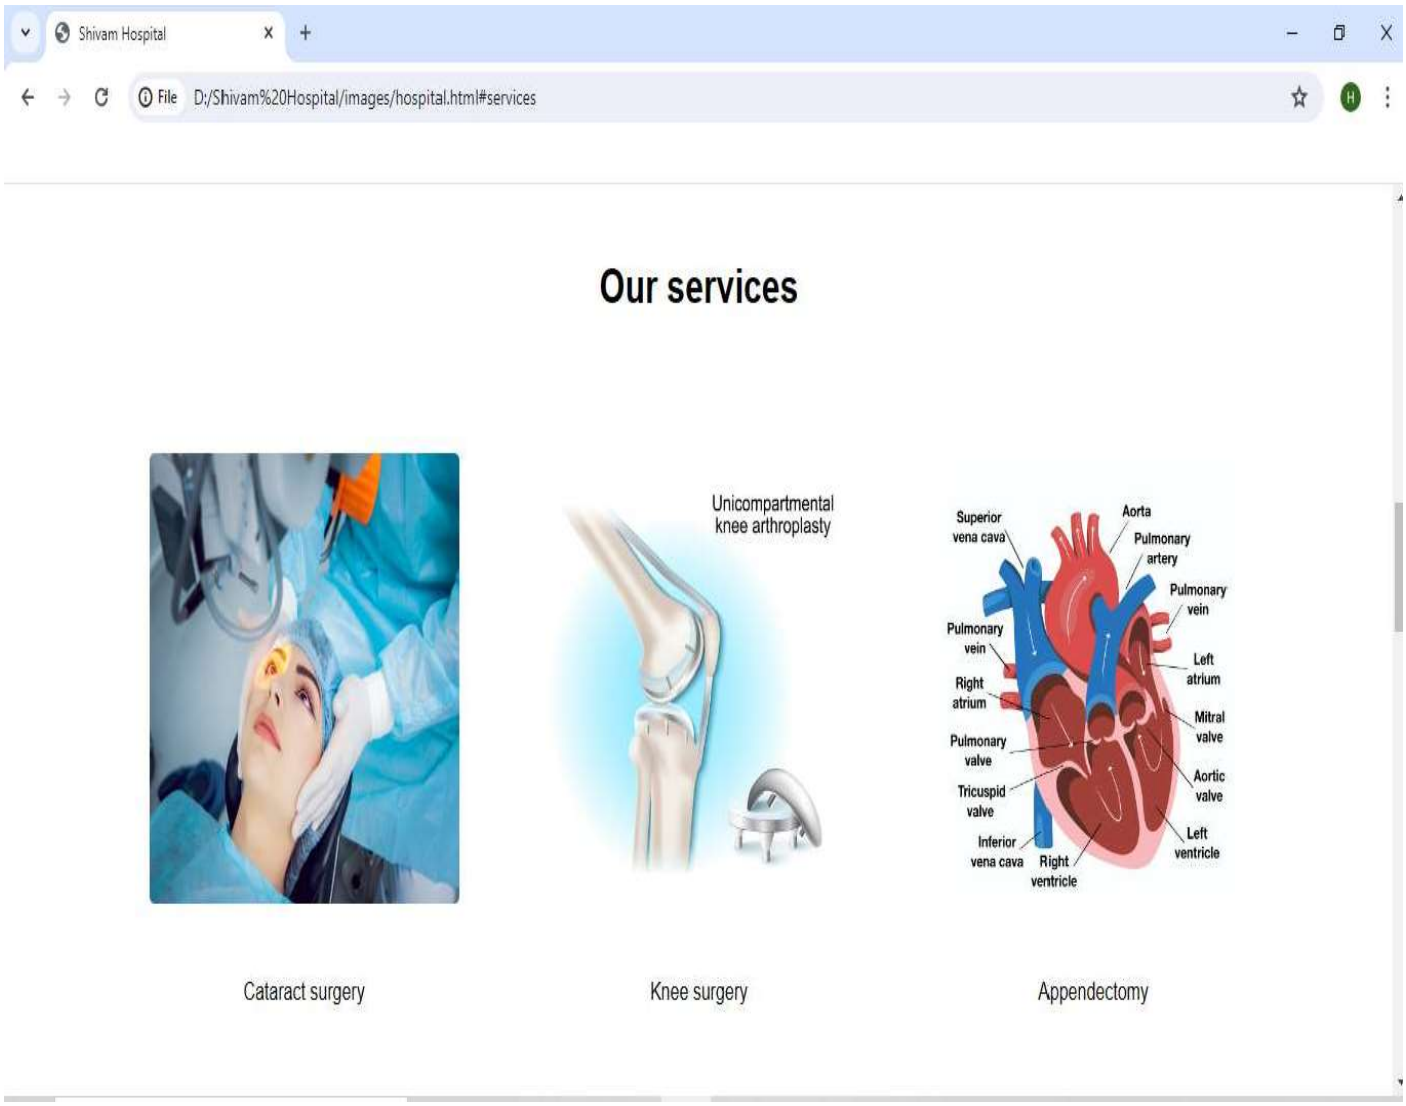
Description:

The hospital website home page features a clear navigation menu, allowing easy access to essential sections like Services, Doctors, About and Contact. A captivating hero section welcomes visitors with an inviting image or video and a concise tagline. Key services, appointment booking options, and patient resources are prominently highlighted, catering to the needs of patients and their families. Testimonials and news updates add credibility and keep visitors informed about the hospital's latest developments and events.



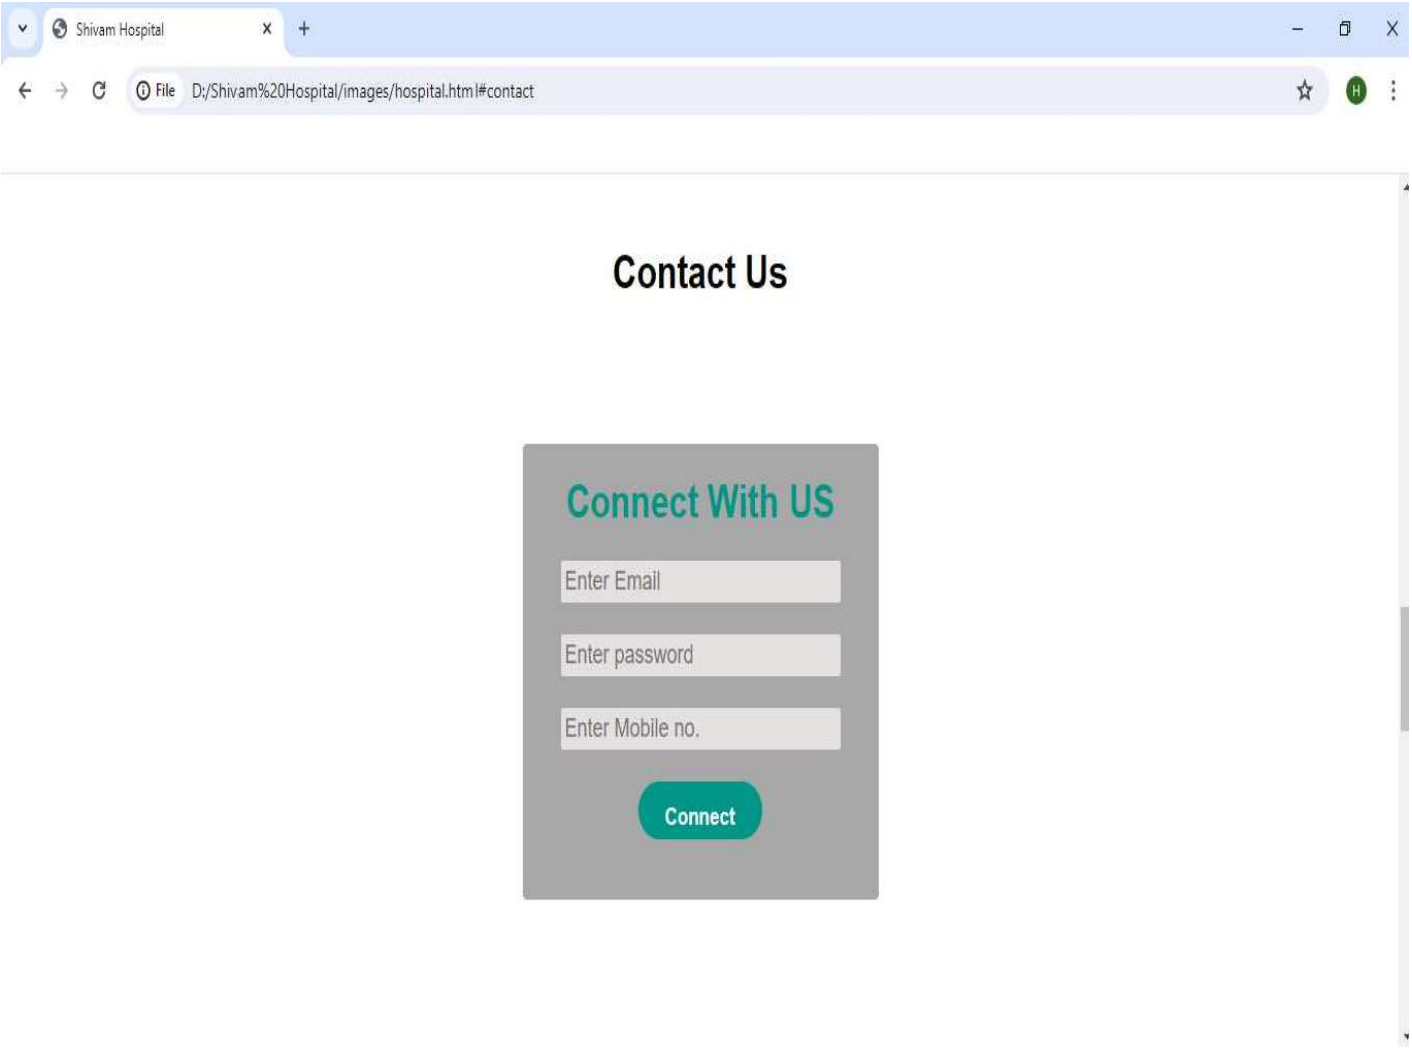
Description:

The doctor page displays a searchable directory of hospital healthcare providers, featuring each doctor's specialty, qualifications, and contact details. Detailed bios highlight expertise and patient care approach, aiding visitors in making informed healthcare decisions. Patient reviews may enhance trust and provide valuable feedback on doctors' services.



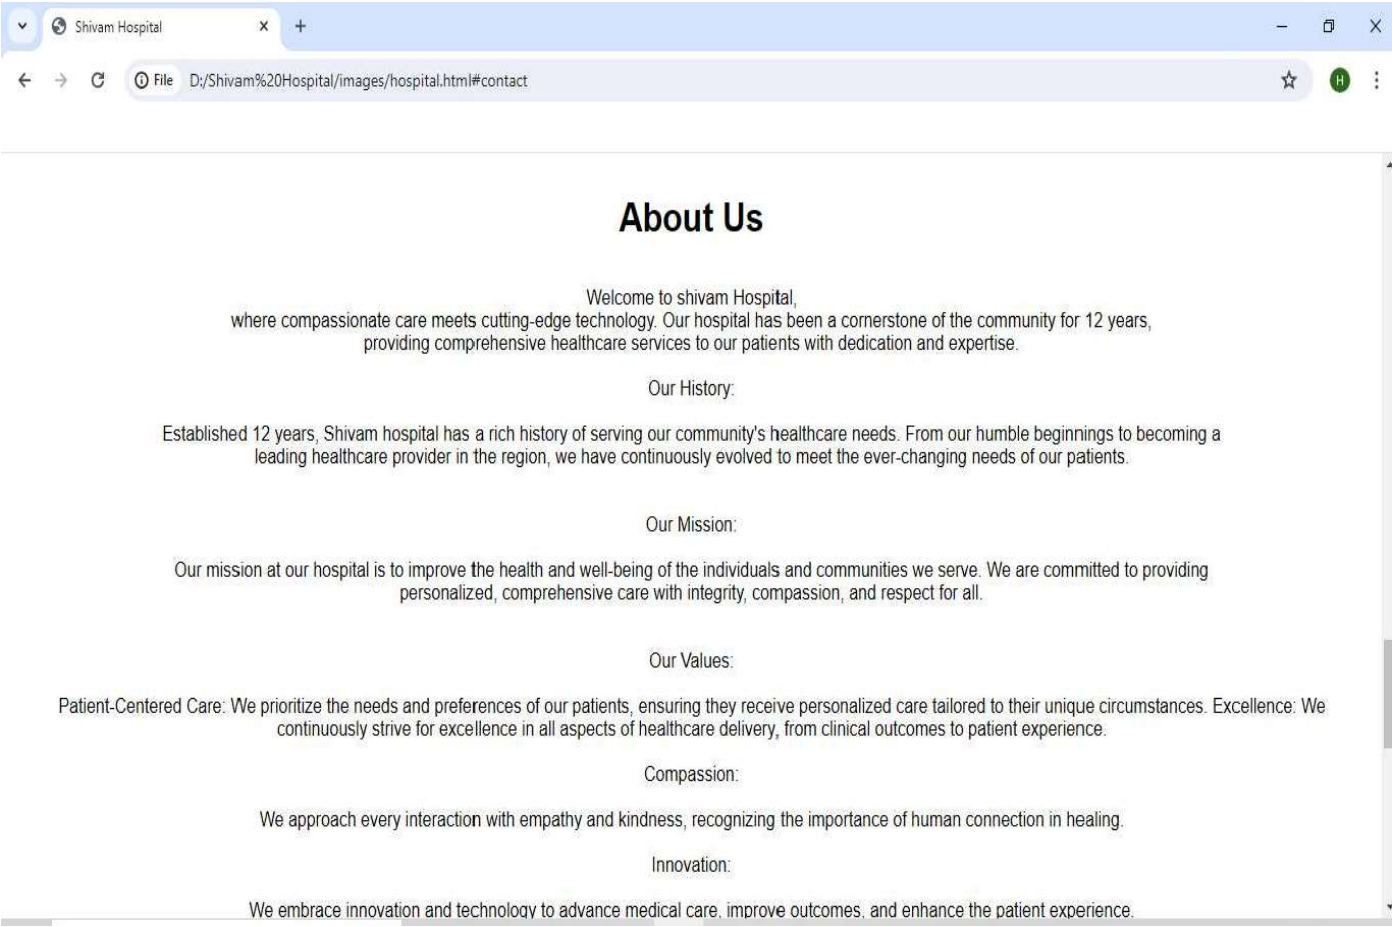
Description:

The services page on a hospital website offers a comprehensive overview of the medical treatments and facilities available. It categorizes services into specialties such as cardiology, oncology, and pediatrics, providing detailed descriptions of each. Visitors can easily navigate through different departments, accessing information on treatments, procedures, and medical technologies offered. Clear CTAs prompt visitors to learn more or schedule appointments, facilitating engagement and access to healthcare resources.



Description:

The contact page on a hospital website serves as a central hub for visitors to find essential contact information and reach out to the institution. It typically includes phone numbers, email addresses, and physical addresses for various departments such as admissions, billing, and general inquiries. Additionally, a contact form allows visitors to send messages directly to the hospital administration or specific departments, streamlining communication. Maps and directions may also be provided to help visitors locate the hospital easily.



Description:

The "About Us" page on a hospital website provides visitors with insight into the institution's history, mission, and values. It offers an overview of the hospital's founding, growth, and notable achievements, highlighting its commitment to quality care and patient satisfaction. Information about leadership, accreditation, and affiliations may be included, showcasing the hospital's credibility and expertise. Additionally, the page may feature testimonials from patients, staff, and community partners, reinforcing trust and connection with visitors.

LIMITATION OF THE PROJECT

5. Limitation of the system:

- Building a hospital website brings immense advantages but also poses certain limitations.
- The size of the database increases day-by-day, increasing the load on the database back up and data maintenance activity.
- Training for simple computer operations is necessary for the users working on the system.
- Accessibility challenges may arise for patients with limited internet access or digital literacy.
- Currently , The connect button is not able to login ,but in future it will be work.
- Maintenance and updating are ongoing tasks to ensure information accuracy and user trust.
- Despite these limitation, a thouhtfully designed website remains a vital tool for enhabncing Patient engagement and healthcare communication.

FUTURE SCOPE OF THE PROJECT

6. Future scope of the System:

- This System being web-based and an undertaking of Cyber Security Division, needs to be thoroughly tested to find out any security gaps.

- A console for the data centre may be made available to allow the personnel to monitor on the sites which were cleared for hosting during a particular period.

- Moreover, it is just a beginning; further the system may be utilized in various other types of auditing operation viz. Network auditing or similar process/workflow based applications.

- Integration of telemedicine services will enable virtual consultations, while AI-powered virtual assistants will enhance user experience.

- Advanced analytics and blockchain technology will ensure secure data management, while immersive VR and AR experiences will revolutionize medical training and patient education.
